

LIMOUSINES

Extended Service Protection Plans

Comprehensive coverage available for limousines built to comply with Federal Motor Vehicle Standards (FMVSS), Gross Vehicle Weight Ratings (GVWR) and built on the following chassis: Ford, Lincoln, Chrysler, Mercury, Dodge, Jeep, Chevrolet, Pontiac, Buick, Oldsmobile, Hummer and GMC. Foreign and exotic vehicles are excluded from coverages.

Pricing

Varies - determined by length and year of vehicle, mileage, terms, plan and any endorsements ordered - call for estimate.

Deductible

Varies - determined by year of vehicle - currently model years 2001 to present = \$200.00; model years 1999 - 2000 = \$250.00

Terms Available

(in years/miles) - 1/12,000; 1/25,000; 2/25,000; 2/50,000; 3/50,000; 3/75,000*

Plans Available

- **Powertrain Only** (see page 2, sections #1 to 3 for coverage details)
Eligibility: All covered components must be functioning at time of purchase
Eligible Model Years: 1999 - Present year with less than 75,000 miles. *3 year/75,000 mile term is only available on vehicles with less than 50,000 miles.
Used: Vehicles with less than 1 month OEM warranty remaining or no warranty
Endorsements available - see page 2, sections #12 - 16 for endorsement coverage details
- **Powertrain Plus** (see page 2, sections #1 to 11 for coverage details)
Eligibility: All covered components must be functioning at time of purchase
Eligible Model Years: 1999 - Present year with less than 75,000 miles. *3 year/75,000 mile term is only available on vehicles with less than 50,000 miles.
Used: Vehicles with less than 1 month OEM warranty remaining or no warranty
Endorsements available - see page 2, sections #12 - 16 for endorsement coverage details
- **Powertrain Plus Deluxe** (see page 2, sections #1 - 16 for coverage details)
Eligibility: All covered components must be functioning at time of purchase
Eligible Model Years: 1999 - Present year with less than 75,000 miles. *3 year/75,000 mile term is only available on vehicles with less than 50,000 miles.
Used: Vehicles with less than 1 month OEM warranty remaining or no warranty
Endorsements available - see page 2, sections #12 - 16 for endorsement coverage details
- **Endorsements - available in addition to your preferred Powertrain Plan** (see page 2, sections #12 - 16 for coverage details)
Eligibility: All covered components must be functioning at time of purchase
Eligible Model Years: 1999 - Present year with less than 75,000 miles. *3 year/75,000 mile term is only available on vehicles with less than 50,000 miles.
New: Vehicles with a minimum of 6 months OEM warranty remaining on all components.
Almost New: Vehicles with a minimum of 1 month OEM warranty remaining on all components.
Used: Vehicles with less than 1 month OEM warranty remaining or no warranty
- **Surcharges**
Surcharges applicable on all diesel engine vehicles.

Procedures/Transfers, Renewals, Cancellations

- **Application Procedures** - signed applications and all program fees must be received by TrixMotive Inc. dba Moonlight Industries within (3) days of final payment of vehicle, and submitted to USWC within (10) days of the application date, for underwriting approval. Upon receipt of completed application, TrixMotive, Inc. dba Moonlight Industries will issue applicant a service contract booklet and the signed "canary" copy of the application. Upon approval of the application, a Declaration/Endorsement Page and wallet I.D. card will be issued directly to applicant.
- **Claims Procedures** - the contract holder is encouraged to return to the TrixMotive Inc. dba Moonlight Industries, an authorized service center, or any licensed ASE repair facility to perform the repairs subject to approval. It is the duty of the **Contract Holder** to obtain an authorization number from United States Warranty Company **prior** to having vehicle repaired. Upon completion of the authorized repair, the repair facility may either collect the non-covered amount and the applicable deductible from the Contract Holder and bill USWC for the balance, or may require payment directly from the Contract Holder and request the Contract Holder seek reimbursement from USWC. The Contract Holder/Repair Facility may utilize USWC's national credit card for payment for the amount authorized, less the deductible.
- **Transfers, Renewals, Customer Cancellations** - Commercial service contracts are non-renewable, non-transferable and non-cancellable by customer. Certain exceptions may apply, see Special State Requirements/Disclosures in the Service Contract for details, or contact United States Warranty Company directly for more information.

United States Warranty Company reserves the right to reject any application for any reason deemed appropriate. USWC reserves the right to cancel the contract based on any act of concealment or misrepresentation of any material fact related to the contract.

LIMOUSINES

POWERTRAIN ONLY
Sections #1 to 3

1. **ENGINE - Gasoline:** Internally lubricated parts: bearings, pistons, piston pins and rings, valves, valve springs, valve spring retainers, timing chain or belt tensioners and rocker arms. Timing gear, oil pump, valve guides, followers, valve seats, rocker shafts, push rods, valve lifters, connecting rods, crankshaft and main bearings, camshaft, cam bearings and rocker bushings. Other parts: water pump, fuel pump, engine mounts, engine cushions, exhaust manifolds (new vehicles only), intake manifold, timing cover, harmonic balancers, vacuum pump, flywheel (flexplate), flywheel ring gear, dipstick and tube, pulleys and eccentric shaft. Engine block, cylinder heads, cylinder barrels, cylinder sleeves/liners, oil pan and valve covers. **Diesel Engine:** All of the above parts plus fuel heater, fuel injection pump and fuel injectors.
2. **AUTOMATIC OR STANDARD TRANSMISSION** - Internally lubricated moving parts contained within the transmission case: torque converter, front pump, drums, reaction shaft, main shaft, counter shaft, input shaft, gears, hub, shift rails, shift forks, internal linkage, bearings, trans mounts, internal trans axel seal, vacuum modulator, oil cooler, oil cooler lines, filler tube and dipstick, the transmission case and oil pan.
3. **DRIVE AXEL ASSEMBLY** (front or rear) - Internally lubricated moving parts contained within the drive axle housing: Constant velocity joints, universal joints, wheel drive hubs and bearings, axle bearings, pinion bearing and non-serviceable bearings. Axle shafts, drive shaft, support and retainer. The drive axle housing and final drive housing.

POWERTRAIN PLUS
Sections #1 to 11

4. **ENGINE COOLING/HEATING** - Water pump including: Impeller shaft, bearings and bushings. Radiator, heater core, thermostat, fan, fan clutch, fan motor, controller module, coolant recovery unit, fan shroud, electric block heater, heater ducts and cabins.
5. **FUEL SYSTEM** - Gasoline & Diesel: Fuel pump, fuel injector pump, fuel injectors, fuel distributor, sending unit, fuel tanks, metal fittings, metal fuel lines, fuel pressure regulator, vacuum assist booster pump and auxiliary tank switch.
6. **SUSPENSION** - Upper and lower control arms, king pins, control arm shafts, rubber suspension bushings, spindle, spindle supports, coil and leaf springs, torsion bars, stabilizer shaft links or bushings, strut bar, rod or link, steering knuckles, wheel bearings, strut and strut bushing (except strut cartridges), leveling compressor, relays, height sensors, compressor lines and airbags.
7. **STEERING** - Internally lubricated moving parts contained within the steering box and the steering box. Rack and pinion gear, power steering pump, power cylinder assemble, pitman arm, idler arm, steering column, bearings, tie rods, drag link, center link, steering damper, control valve and cylinder, cooler, cooler lines, main and intermediate shaft and coupling.
8. **BRAKES** - Master cylinder, power brake cylinder, vacuum assist booster, booster pump, wheel cylinders, disc brake calipers, combination valves, equalizer valve, hydraulic control unit, backing plates, rear actuators, springs, clips, retainers, self adjusters, drums, parking brake linkage and cables, hydraulic lines and fittings. Air Brakes: The compressor, tank, auto bleeder valve, air dryer, diaphragm, treadle, slack adjusters and compensating valve.
9. **DASH AIR CONDITIONING** - Compressor, compressor clutch, compressor switch, clutch coil, idler bearings, evaporator, condenser, condenser fan motor, receiver-dryer, accumulator, programmable temperature control, POA valve, expansion valve, suction valve, orifice tube, power module, blower motor, blower fan motor, high/low cut off switches, pressure cycling switch, pulley, duct and duct outlets.
10. **ELECTRICAL** - Generator or alternator, voltage regulator, starter motor, starter solenoid, starter drive, front and rear window wiper motor, distributor, coils, electronic timing control unit, solenoids, relays, front window defroster, mirror motors, mirror controls, power door lock actuators, lock solenoids and control switch, turn signal switch, horn and horn switch, dual battery paralleling switch, battery isolator, back-up alarm and its switch, relay and audible device. Manually operated driver control switches, vent fans, dashboard clock, cruise control transducer and its engagement switch, servo, relays and power converter.
11. **FRAME** - Bumper welds, bumper wheels and all chassis frame welds.

POWERTRAIN PLUS DELUXE
Sections #1 to 16

ENDORSEMENTS
Sections #12 - 16

12. **SEALS & GASKETS** - Seals and gaskets on covered components which prevent the loss of fluids or refrigerants.
13. **AUDIO/VIDEO** - Television: (21" or less) (excluding flat panel, LCD and plasma screen televisions/monitors): Circuit boards, CRT power supply, control panel, picture tube and the tuner; AM/FM stereo with cassette deck and/or CD/DVD player; Circuit boards, power supply, tuner assembly, heads, motors, amplifier and laser pickup; VCR/VCP: Circuit board, CRT power supply, control pane, tape guide motor and video and audio heads; Intercom system, backup camera and monitor.
14. **AUXILIARY ALTERNATOR(S)** - Bearings, stator, rotor and diodes.
15. **AUXILIARY AIR CONDITIONER(S)** - Compressor, compressor clutch, compressor switch, evaporator, condenser, accumulator, expansion valve, suction valve, orifice tube, receiver-dryer, blower motor, blower motor fan, high/low cut-off switches and pressure cycling switch. **AUXILIARY HEATER** - Blower motor, heater core and main control switch.
16. **ELECTRICAL/LIGHTING** - Door activated lights, side directional lights, rope lights, courtesy lights, California neon, fiber optics, opera lights, dimmers, lighted signs, multiple electronic designation sign, control switches and LED lights.

LIMOUSINES

F.A.Q.

Many of your questions may be answered here, however if the answer you are looking for is not, questions can be e-mailed to warranty@limosbymoonlight.com, and they will be answered as soon as possible.

1. Who is the United States Warranty (E.S.P.) Corporation?

United States Warranty (E.S.P.) is a national company located in Willoughby Hills, Ohio. USWC designs, sells and administers recreational, sports and transit vehicle Service Contracts. Established in 1975, USWC is one of the oldest Service Contract administrators in the industry. USWC is a member of the Recreational Vehicle Industry Association, Recreational Vehicle Dealers Association, Family Motor Coach Association, Pennsylvania RV and Camping Association, American Bus Association, National Limousine Association, American Public Transportation and also exhibits yearly at the RIVA, RVDA, Power Sports and other industry trade shows.

2. Are USWC Service Contracts available online or direct to consumers?

United States Warranty (E.S.P.) Service Contracts are only available through their coast-to-coast dealer network and are not available online or direct to consumers.

3. What is the difference between the Service Contract and the warranty offered by the manufacturer?

Most new vehicles come with a manufacturer warranty that covers all components for a stated amount of time. Upon expiration, or upon conversion of a vehicle, you have no protection against breakdowns and failures. The Service Contract assures that for a specified amount of time purchased, both parts and labor required to replace or repair an authorized mechanical breakdown of your vehicle will be covered. New and Almost New coverage runs concurrent with the manufacturer warranty. For example, if the manufacturer warranty is two years, and a seven year contract term is purchased, the customer will have five additional years of coverage through USWC. Used coverage commences on the date the vehicle Service Contract was purchased and runs the length of the term purchased.

4. What is the difference between New and Almost New coverage?

The coverage is identical. As an incentive to customers to purchase a Service Contract at the time of vehicle purchase, new coverage is less expensive. However, customers that decide not to purchase the additional coverage at the same time as the vehicle purchase still have an open door to purchase a Service Contract at a later date, at a higher, Almost New rate, as long as there is at least one month of manufacturer warranty remaining on the vehicle. The effective coverage date for Almost New reverts back to the original in-service date. Accordingly there is no advantage for the customer to wait to purchase the Service Contract. An Almost New surcharge applies.

5. When does coverage take effect?

Coverage is not in force until the application and payment are received and approved by the USWC Underwriting Department. New and Almost New coverage takes effect on the original in-service date. If the customer purchases a five year Service Contract six months after buying the vehicle, coverage starts on the vehicle's original purchase date, not from the contract purchase date. Used coverage commences on the date the vehicle service contract was purchased and runs the length of the term purchased.

6. What if the original in-service date is unknown?

If the original in-service date can't be determined, the date is established as January 1st of the vehicle model year.

7. Can options be added after the application has been approved?

Options may not be added to a Used Service Contract after the initial purchase.

8. Are parts and labor included?

Yes, as long as the parts are listed in the service contract coverage.

9. Are there any maintenance requirements?

Vehicles must be maintained in accordance with the vehicle manufacturer's maintenance schedule. The contract holder must be able to provide our claims department with verifiable receipts and work orders in the event of a failure.

10. Is the deductible charged on each item?

If there are multiple failures reported at the same time, there is only one deductible charged.

11. Can service contracts be transferred, renewed or cancelled by customer?

Commercial Division service contracts are non-cancellable by customer, non-transferable and non-renewable. Certain exceptions may apply, see state modifications in the service contract or contact us for more information.

United States Warranty Company reserves the right to reject any application for any reason deemed appropriate. USWC reserves the right to cancel the contract based on any act of concealment or misrepresentation of any material fact related to the contract.
